Whitening Care

For La Cure Lab, it's a victory.

For your skin, the light of beauty.

Because every woman is genetically unique and reacts differently to UV exposure, La CURE brings specific solutions and offers a full line to suit each woman's whitening needs.

High Technology White Solution

A new approach to Whitening Treatment.

With White, La CURE researchers have made a real breakthrough in depigmentation treatment. It simply goes beyond everything you could have ever hoped for your skin:

A visibly younger and whiter skin. Day after day...and there to stay !

The FACTS:

- Over exposure to sunlight quickly leads to overproduction of melanin.
- Day after day, exposure to UVA and UVB rays creates sun stress.
- Melanin increases, dark spots appear and dryness develops.

The SOLUTION:

La CURE Whitening Care brings the promise of brighter skin to light.

In just a few minutes every day, simple basic care restores and protects skin from blemishes, freckles and dark spots caused by the sun's ultraviolet rays, skin ageing or pregnancy.

Morning treatment moisturizes and lightens while protecting skin from damaging sun exposure.

Evening treatment speeds progress to skin whiteness. Melanin decreases, freckles fade. With White LAB +, flawless and perfectly translucent skin appears.

➤ **How La Cure White protects from Anti-radical and why?**

Exposure of low pigmented skin to a severe ultraviolet absorption can cause a pigment lysis and lead to the release of free radicals, e.g. radical oxygen, which are highly aggressive for cells.

This situation even if unlikely to occur should not be neglected.

It is therefore essential that La CURE Depigmentation complex, together with its depigmentation activity, is able to play a protective role towards free radicals.

Through its powerful detoxicating equipment, glutathione reductase, La CURE Depigmentation complex reinforces the natural anti-radical protection of the body. In addition to that, its high content in amino acids, e.g. tyrosine and tryptophane, makes La CURE Depigmentation complex an excellent trap for free radicals and an active preventive agent against aging.

SPF30 DAY CREAM

Full day Protection –Hydration

The FACTS:

The next time you think about going out in the sun unprotected, remember this; the sun gives off three types of harmful ultraviolet rays:

They are:

UVA (Ultraviolet A)

These rays penetrate deep into the skin, causing skin to wrinkle and sag, contributing to skin cancer.

UVB (Ultraviolet B)

These rays can cause unprotected skin to burn and are thought to be the primary cause of skin cancer.

UVC (Ultraviolet C)

These rays are deadly to plant and animal life. The ozone layer protects the earth by absorbing UVC rays. But with the ozone layer thinning, we may be exposed to more UVC rays in the future, causing more skin cancer and eye damage.

THE SOLUTION:

Spf 30 Day Cream contains different kind of UV photo-protector Filters: one of them is Zinc O₂.

Each one has its own activity spectrum. Both of them will be UVA and UVB protection but our Research Laboratory has come out with this very special Natural filter, the Zinc O₂ which will have significant results in protecting from the UVC. This means that when using Spf 30 Day Cream you will be fully protected.

Beauty benefits

Scientifically-proven formula

UVA –UVB- UVC Full Protection.

Discover a new dimension in daily skin protection! For the first time, an ultra protective day screen acts like an invisible beauty bubble to help avoid premature skin aging, sensitivity, and dark spots while pollution and free radicals are blocked out with Vit E extract. Furthermore, a study done in 1990 as proven that the fact of adding VIT E to a solar cream increases significantly the protection and diminishes skin damage. This incredibly lightweight texture is imperceptible to the touch. Spf 30 Day Cream also contains a protective SPF 30 and is scientifically reviewed and clinically tested.

Spf 30 Day Cream actively fights the signs of aging while protecting the skin from the harmful effects of the sun. A broad-spectrum, anti-aging sunscreen protects against UVA and UVB damaging rays using different screens, one of them being Zinc O₂, a non-chemical, mineral screen. Anti oxidants and anti-inflammatory ingredients help to immediately start repairing ultraviolet damage. This is the most advanced UVA/UVB/UVC SPF treatment La CURE has ever created.

TIME FIGHTING SERUM
Anti-Oxidant Anti-Free Radical
Deep Hydrator
First Signs of Age

Beauty benefits:

Thanks to its strong expertise in the skin ageing process, La CURE created to stimulate and prolong the skin's youthfulness after 25-30 the Time Fighting Serum.

Each wrinkle corresponds to a specific depth of damage brought to the skin. Time Fighting Serum targets the epidermis precisely where the very first signs of skin ageing appear with lines of facial expression.

This Serum holds your skin's future in a truly revolutionary formula.

The exclusive Complex Bio PPS6, - Padina Pavonica, Japanese Green Tea extract, Organic silicium all combine to intensively moisturize and to assert Time Fighting Serum, as a spectacular and unique anti-aging serum to fight the first signs of age. Time Fighting Serum is a great protection from anti-oxidant and free radicals.

Time Fighting Serum contains an exclusive anti-aging complex and encapsulated silicium derivative to:

- ✓ Smooth out the first fine lines,
- ✓ Preserve the moisture within the skin
- ✓ Reinforce the anchoring of the epidermis to the dermis,
- ✓ Preserve the natural elasticity of the skin.
- ✓ Protect from anti-oxidant and free-radical.

How Time Fighting Serum works ?

✓ A unique 2-in-1 complex delivers 24-hour deep hydration and protection from environmental damage.

✓ Special anti-oxidant ingredients neutralize free radicals before they can harm skin's appearance, and build a rich anti-oxidant reserve as further protection. Because, after all, research shows it is free radical and other environmental damage--not time--that can cause up to 80% of the visible signs of aging.

✓ Delivers advanced levels of hydration with long-proven Padina Pavonica -nature's "moisture magnet." A clinical test proves skin's level of moisturization increases dramatically and cumulatively with continued use. Enhances your moisturizer's effectiveness.

Results:

Immediately, you'll see healthier-looking skin, with vital moisture restored. By night, it uses the body's natural rhythm of renewal to help repair visible signs of aging and speed recovery from UV and environmental damage. By day, it neutralizes environmental irritants before they can affect skin's appearance.

Regular users attest to the remarkable anti-aging and "hydrating" powers.

Think of it as your "insurance" for definitively younger, healthier-looking skin, for today and tomorrow.

Use:

- Apply mornings and nights to the entire face. Massage with perfectly flat fingers, working from the centre of the face outwards. Pay particular attention to the forehead and the outer eye.

- Use with La CURE skin care adapted to skin needs.

So what do free-radical damage and antioxidants have to do with wrinkles or skin damage? When free-radical damage originates from natural environmental factors and fails to be cancelled out by antioxidant protection, then wrinkles appear. If we don't get enough antioxidant protection, either from our own body's production, from dietary sources, or from other sources (including antioxidants we put on our skin), free-radical damage continues unrestrained, causing cells to break down and impairing or destroying their ability to function normally. Free-radical damage destroys collagen and other skin components.
